

Special Session on
Data Mining for Library
in International Conference on Advanced Software Engineering and Information
Systems (ICASEIS 2013), November 28-30, 2013, Jakarta, Indonesia
<http://ait2013.iaiai.org/icaseis.html>

The use of information systems and networks became popular in libraries, which realizes that libraries can stock many kinds of log data such as loan, entrance, and search histories. This special session focuses on such library-related data as an application of data mining. The scope of the session includes the following topics:

- Book (researcher, or research area) recommendation with search histories
- Book selection with loan records
- Classification and identification of scholarly papers
- Data mining for bibliometrics
- Data mining in institutional repositories
- Log analysis of systems in libraries
- Privacy aspects of library-related data
